DETAILED ACTION

Election/Restrictions

Claims 2, 4, 11, 13, 17 and 31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/26/06.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3, 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 does not clearly define the "pair of" recited in line 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5-10, 12, 14-30, 32 and 34-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (US 2002/0082477). Kim discloses a system for

removing a cover from a medical instrument comprising a flexible cover (15), an insertion element (illustrated in figure 3), a perforation (23) and a tab (paragraph [0026]). Kim teaches all of the limitations of the claims except a pair of substantially parallel perforations. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a second row of perforations on the Kim cover since it has been held that a mere duplication of the essential elements of a device involves only routine skill.
